Notes

- The crediting interest rates shown are calculated before any relevant policy fees and charges are applied (e.g. cost of insurance, administration charge etc.).
- These rates represent historical data and may not be predictive indicators of future crediting interest rates.
- The future crediting interest rates may be less or more favorable than the historical crediting interest rates, depending on various factors such as investment returns and surrenders.
- The crediting interest rate is subject to change from time to time.
- For the crediting interest rates relevant to individual policy, please refer to your policy anniversary statements or reach out to your insurance intermediary.
- Crediting interest rates are displayed as "N/A" because:
 - the corresponding product and/or policy currencies were unavailable in the calendar year; or
 - there were no in-force policies during the concerned reporting year.
